PROGRAMME**

Why Engage with this Programme?

Sustainability and Climate Change: A Sustainability Strategy for the Education Systems.

We have a vision of becoming the world-leading education sector in sustainability and climate change by 2030.

One way of achieving this is by reducing direct and indirect emissions from education buildings, driving innovation to meet legislative targets and providing opportunities for children and young people to engage practically in the transition to net zero.

The education sector needs to play its role in positively responding to climate change and inspiring action on an international stage.

This programme will support you step by step in fulfilling this strategy and positively improving the environmental impact of public & private educational buildings.

Programme Aims

This project aims to assist schools, colleges and training centres in implementing an environmental management system within their own buildings, to reduce their carbon emissions and kick start their journey to carbon neutrality.

This project requires the involvement and collaboration of an appointed school green leader, as well as staff and students, to develop a culture of sustainability for the planet that involves the entire organisation. Therefore allowing us to create a genuine carbon conscious society that is essential for real Climate Action.

Programme Content

This course will guide you through the process of implementing the environmental management system that is required as a starting point to Carbon Neutrality

You will receive 7 one-on-one accountability online coaching sessions and the carbon conscious school training manual.

Topics

-  Creating a Culture of Sustainability
-  Forming a Green Team at your School
-  Measure, Manage and Reduce energy, waste, water, and carbon emissions
-  Green Team Meetings
-  Communication
-  The FSG Method & the FSG Data Portal to measure school's carbon emissions

Benefits to Schools

- 
- ✔ Meet current governmental sustainability policies. [Read more HERE](#)
 - ✔ Instill a green programme within your school to reduce carbon emissions.
 - ✔ Provoke behavioural change within school teachers, staff and students.
 - ✔ Cost savings for the school by reducing the use of energy & water and production of waste.
 - ✔ Upskilling for the School's Green Leader and Green Team representatives - providing valuable Green Skills for Life.
 - ✔ Access to FSG data portal, an online platform to calculate School's carbon emissions.
 - ✔ Your school will receive an Ecolabel digital badge on completion of the programme.

For the Green Leader

Learn invaluable skills in carbon emissions management within an organisation.

Be responsible for your school succeeding in reaching governmental sustainability requirements.

Be provided with one on one training sessions to support your green leading journey.

For the Students

Becoming an eco rep of your school and learn green skills for life that you can also apply at home.

Eco Reps will gain green skills that are growing in demand by employers. Invaluable for when they enter the workplace.

Combat eco-anxiety by taking action on climate change.

We only have One Planet

We only have One Life

We have a chance to
correct our wrongs and
together ...

**BUILD A GREENER
FUTURE!**
